"WE BUILT THE
WORLDS BIGGEST
KICK-DRUM.

A man in a dark suit is performing an acrobatic stunt on a rotating structure. He is positioned horizontally, appearing to be in mid-air or on a thin platform, with his body angled towards the camera. The background is dark, and the structure he is on is made of metal poles and a large, curved surface that acts as a screen. The lighting is dramatic, highlighting the performer against the dark background.

Rotating 360 degrees this acrobatic performance is a ConRytmo original. The kick drum also acts as a 16 foot screen to project video or your brand logo. With a 2-piece drum set mounted to its base within a moment, this performance can literally get flipped upside down.

The worlds largest disco ball can house up to four individuals and be used for multiple applications including: CEO grand entrance, DJ booth, dueling drummers, dancers and more...
